Risk Profile of the Fund

Modified Duration (of the Fixed Income Portfolio) indicates how the fixed income portfolio will move in response to any change in interest rates. For example: if the modified duration is 2 then 1% change in market interest rate will change the value of portfolio by 2% i.e. 2 times the change in interest rate. The value of fixed income portfolio increases when the interest rates falls and vice versa.

BETA is a number that indicates the extent to which value of the portfolio will change with respect to change in value of its benchmark. The benchmark has a beta of 1. Change in value of a portfolio which has a beta more than 1 will be more than the change in value of the benchmark, where the beta is less than 1 the change will be less than the change in benchmark.

Glossary

CAGR (Compound Annual Growth Rate) indicates annual return on the portfolio over years

Benchmark is synthetic mix of index of each asset class basis weights of the asset class in different Unit Linked Funds

The Fund is in compliance with all investment guidelines issued by IRDAI (Insurance Regulatory and Development Authority of India)
